

[PinUp Popper](#) and PinUp Popper [Baller Installer](#)

6/2/26

*PinUp Virtual Pinball System is NOT a system created or maintained by Cleveland Software Design. PinUp Virtual Pinball System was created and is maintained by Nailbuster Software. I highly recommend you go [support them](#) for the great community service they provide for the Vpin world! Cleveland Software Design is not responsible for the maintenance or setup of any individual user's download of any PinUp system. This documentation is meant only to be a free guide for a specific VPin build (3-screen cabinet build detailed in the other CSD tutorials). As a community, feel free to use this guide as a template for your own builds!

Support for the PinUp System can be found at these links:

Before beginning, I HIGHLY recommend you check out and completely read through all of the [PinUP Virtual Pinball System Wiki](#) website. PinUP Wiki has most everything you need to get started and configure the system for your specific needs or requirements. Everything from installation, settings, controller configuration, emulators, adding games, updates, etc. is all on [PinUP Wiki](#) website. Please, use this resource and frequently check it, for it will be a great help to you!

<https://www.youtube.com/watch?v=SPW7fO5vA-k&list=PLLw6pcnEfiyP50Yb4hEFLFCV8ziYZCkYI&index=8>

What's Included

Visual Pinball X(VPX) 10.8.0 Release Candidate 5 Build # 2028 (x64 GL/DX) & v10.7.4
PinUP Player v1.5 (latest)
PinUP Popper FrontEnd v1.5 (latest)
VPINMAME 3.6.0-sc (build 1167) x86/x64
B2s-Backglass Server v2.1.2 (32/64bit)
FlexDMD v1.9.1

DMD-Ext (freezy) v2.3.0 (32/64bit)
Future Pinball w/BAM (latest and greatest)
TerryReds PinEvent FP system
Two original tables: ScottyWics "Leprechaun King" and
TerryRed's "Retro Flair BAM Edition"

/**latest as of Jan /2025 (run PinUPdater to get latest versions afterwards)** //

What's NOT Included

DOF (Direct Output Framework For VP And some FP)
DOFLinx (For FX2 & FX3, FP And Mame)
UltraDMD (uses FlexDMD instead as that is the suggested replacement today)
FutureDMD / FPIntercept (realdmd for some future pinball)
drivers for hardware like pinscape, pin2dmd usb driver, pindmdv3 dlls. (outside of
dmdext/freezy support)

*DOF is not included in Baller Installer, but was created by another team. DOF handles haptic feedback toys such as we have available on Cleveland Software Design's website for VPinball and MAME. These toys include solenoids, knockers, shakers, control boards, ssf, addressable leds, etc. Check out our website for more information! I highly recommend an [Extreme builders kit](#) which will be used for this tutorial series.

What if I mess up and need to start over?

If you need to start over for any reason whether it be weird settings that you can't fix, display issues, file paths, etc. I recommend using Rudy's Arcade's guide on preparing for a fresh install:

 [How To Prepare For A Fresh Install](#)

<https://www.youtube.com/watch?v=SQRNqoPULL4&t=2s>

CSD PinUp Popper Baller Installer Guide

Initial Requirements

- Windows 10/11.
 - This guide will be using Windows 11.
- PC and 3 Monitors already installed and connected to each other.
- Patience to read all of the documentation on the PinUp Wiki and this guide without skipping anything.
- Patience with yourself and your PC.
- Courage to use the support groups mentioned before.

1. Set up DISPLAYs

It is crucial to set up displays properly before running baller installer. I personally had a lot of issues in the past with displays that were due to doing this out of order.

- a. Navigate to “Display Settings” in your Windows Settings and ensure the display settings are as follows:
 - i. Landscape
 - ii. Scale 100%
 - iii. Resolution (I recommend the highest supported resolution of your PC/monitors, or the recommended resolution)
 - iv. Multiple Displays (Remember I have 3 displays→ playfield, backglass, dmd)
 1. Make your playfield monitor primary
 2. Toggle “multiple displays” on if off
 3. Line everything up
 - a. From left to right your displays should be:
Playfield→Backglass→DMD
 - b. Order of numbers does not matter
 - c. Displays MUST be in a straight line across the top. The tops of the screens must all line up.
 - v. Reboot the PC and ensure the screen settings are correct.

Display

Select and rearrange displays

Select a display below to change its settings. Some settings are applied to all displays.

Color

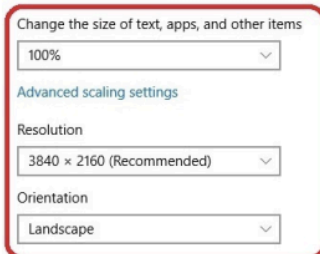

Night light
☐ Off

Night light settings

HDR and WCG
☐ Off

HDR and WCG settings

Scale and layout

Screens MUST NOT be positioned in the Red areas! (negative x / y values)

Your Backglass, DMD, Topper screens MUST be positioned in the Green areas, with the playfield as the Primary screen.

Make sure ALL of your screens are set to 100% for "size of text, apps, and other items"

If using multiple displays, you most likely want to go to your taskbar settings in Windows and set this;

2. Turn off antivirus software

- I recommend turning off antivirus software before installing so that Windows doesn't restrict or block anything. You can turn on antivirus software after the installation is done, but it is recommended to place the "Visual Pinball" folder in the "Exclusions" section of the antivirus settings.
- Do so at your own risk!
 - A designated VPinball PC is still concerning, but having these turned off on a personal computer can be a huge risk. Do not blame CSD if you get malware!
- Navigate to the "Virus and Threat Protection" settings in Windows

- i. Select “manage settings” for Virus & Threat Protections Settings and switch the following to off:
 - 1. Real-time protection
 - 2. Dev Drive Protection
 - 3. Cloud-Delivered Protection
 - 4. Automatic sample submission
 - 5. Tamper Protection

3. Download PinUp Popper Baller Installer

- a. Make sure you are connected to the internet for the duration of the installation.
- b. In your internet browser search for “[PinUp Popper Baller Installer](#)” and navigate to Nailbuster’s website.
 - i. I recommend you read all the information on the [PinUp Wiki](#), especially the starting page and the install page. This will clarify things and save a lot of headaches if you get stuck.
- c. Navigate to the “Download Installer” heading and download the most recent version.
 - i. Your browser will likely flag the download and ask you to keep it once fully downloaded.
 - 1. Press the 3 dots (More actions) and select “keep”.
 - 2. “Make sure you trust PinUp_Popper_Baller_Installer...exe before you open it”.
 - a. Press the down arrow
 - i. Press “Keep anyway”
- d. Open File Explorer
 - i. Unblock the installer application
 - 1. Find the download. Should be something like “PinUp_Popper_Baller_Installer...exe”
 - a. Right click
 - b. Navigate to properties
 - c. Select Unblock
 - d. Select Apply
- e. Run the Application
 - i. If it asks, allow it to make changes to the device.

PinUP Popper "Baller" Installer

Here it is! If you are just starting out with a fresh win10/11 (64 bit) system and want to get all your virtual pinball apps up and running in minutes... come join the 20,000+ PinUP "Baller's" Community!!

Note: This is for NEW installs only, **DO NOT install overtop an existing virtual pinball cabinet!!** Best to start with a clean-fresh windows 10/11.

If you're looking to update an already existing Baller installer, check the updates [wiki page here](#):

If you don't want to use Baller Installer and want to manually install PinUP Player drivers see [wiki page here](#):

The installer is made fairly 'safe' as it doesn't install or change your windows system components (other than the Microsoft DirectX 9 installer). There is no automatic-uninstall option as many sub-components are installed within so make a backup of your system if you're just trying it out, or you will need to remove each component/settings manually.

READ THE LICENSE AGREEMENT BEFORE INSTALL... You can see [it here](#):

The installer does not override any of the licenses of the software parts contained in the all-in-one. You must abide by all the licenses of each component contained. See included software and view their agreements beforehand.

PinUP Software is licensed as free for NON-COMMERCIAL USE. Which means Cab Builders are not permitted to include PinUP Popper and Player with their cabs unless they get permission to (this ensures Cab Builders don't include other community/unlicensed content). If you purchased a virtual pinball cabinet 'fully loaded' and it contained PinUP Popper Front-End then you are using an unlicensed copy, **ALWAYS ASK YOUR CAB BUILDER IF THEY HAVE FULL LICENSE TO ALL INCLUDED GAMES/TABLES/SOFTWARE!!**

A lot of time/effort went into getting PinUP and all these parts working nicely together. BUT it's important to give A LOT of credit to all the **Developers** of the software and to all **Table Authors** and **many others** that have put countless 'hobby' hours of their time to help the virtual pinball community over the years!! Supporting them by joining the VP communities and personally thanking them goes a long way. Cheers

Watch my video tutorial of how to install PinUP "Baller"....

note: You should start with a fresh win10/11 system. Before installing you should get any drivers for stuff like your real-dmd or button controllers installed and tested/working properly. Using Nvidia cards... see [this](#):

After you got that all up and running:

- What is and what isn't installed:
 - Heads UP!!
 -
 - Installing the latest PinUP Updates (FINAL STEP)
 - Read the remainder of this page to ensure a smoother install.
 - ANTI-VIRUS SOFTWARE!!
 - Zip
 - DOF R3++
 - Setting the DPI Scaling (Text Size) to 100% for ALL Screens in Windows!
 - Pinup Player and Popper are setup for Landscape Windows Orientation by Default
 - Make sure your Displays in Windows are NOT in a negative value position!
 - Display Order
 - Windows Security (do not set things to always 'Run as Admin')

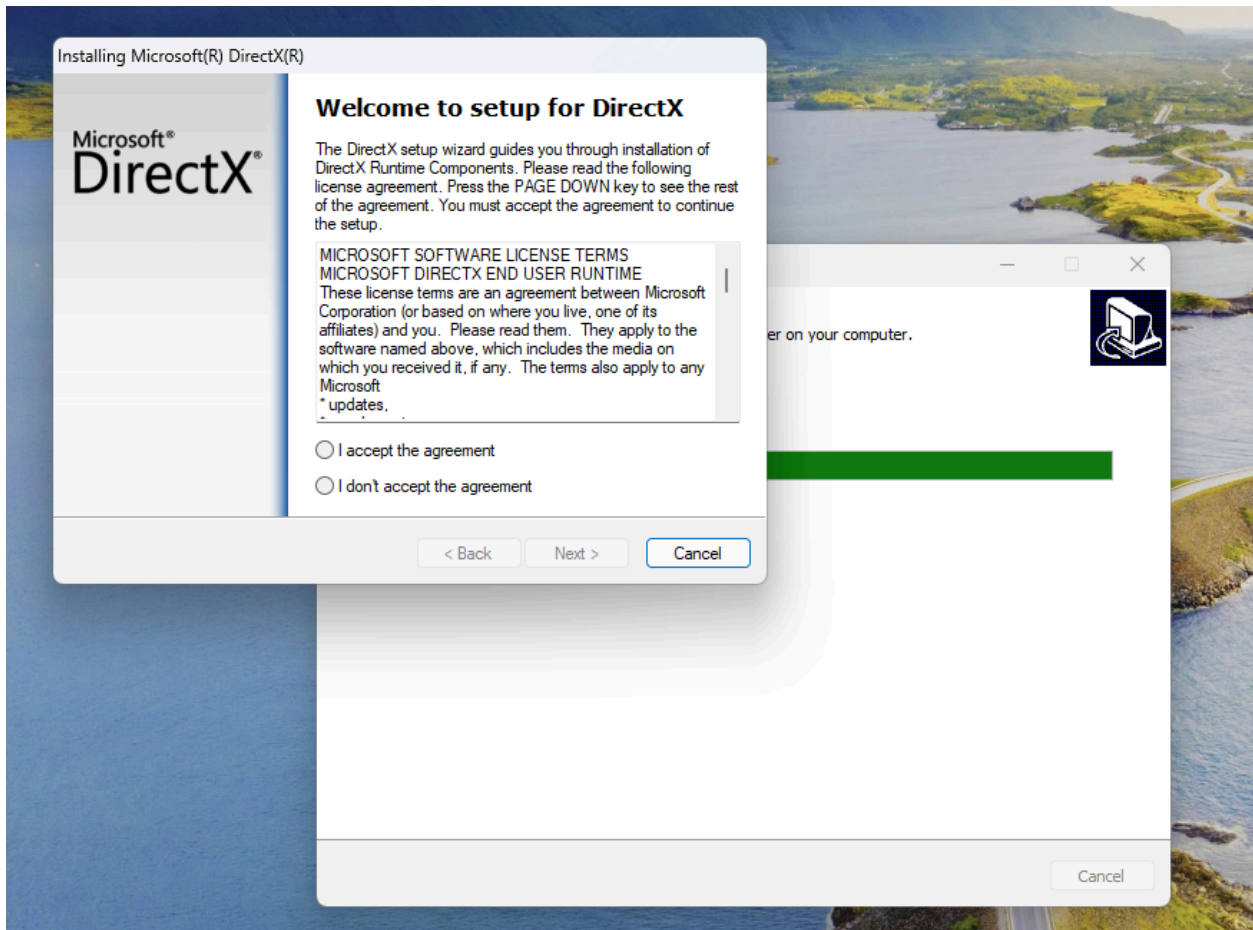

4. Set Up

- a. License Agreement
 - i. Select “I accept the agreement”
 1. Next
- b. Select Destination Location
 - i. Leave it as whatever the default location is. At the time of this guide, it is “C:\vPinball”
 - ii. Next
- c. Ready to Install
 - i. Select “Install”
 1. At this point, the installation will begin. There may be a few programs that open up; ignore them until the installation is complete.
 - ii. Leave “Set Up- PinUP Popper Baller Installer...” open for this next part.

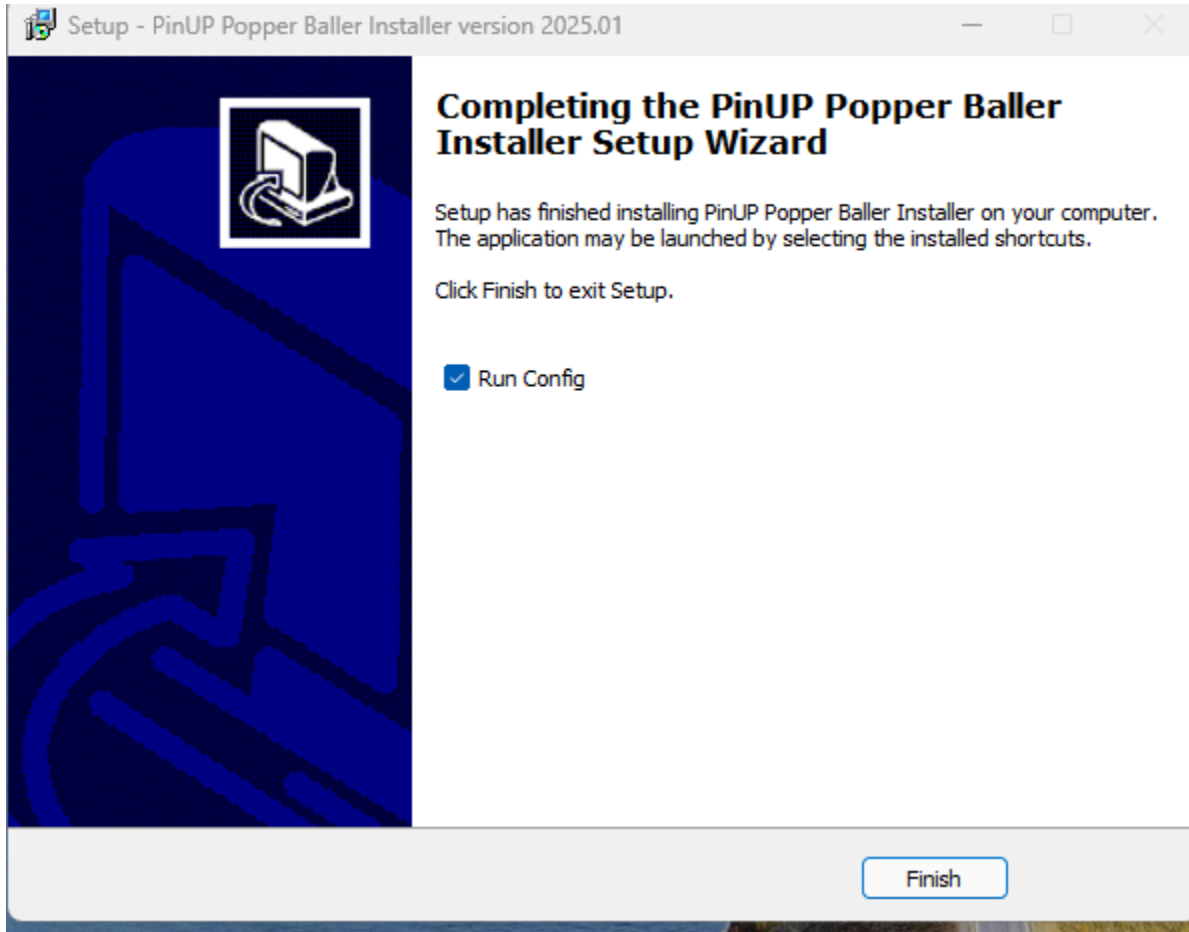

5. DirectX

- a. At the end of the “Set Up” Installation, DirectX will appear.
 - i. Select “I accept the agreement”
 1. Next
 - ii. DirectX Runtime Install
 1. Next
 2. DirectX will then install...
 - iii. Installation Complete
 1. Finish

6. Finishing “Set Up- PinUP Popper Baller Installer..”

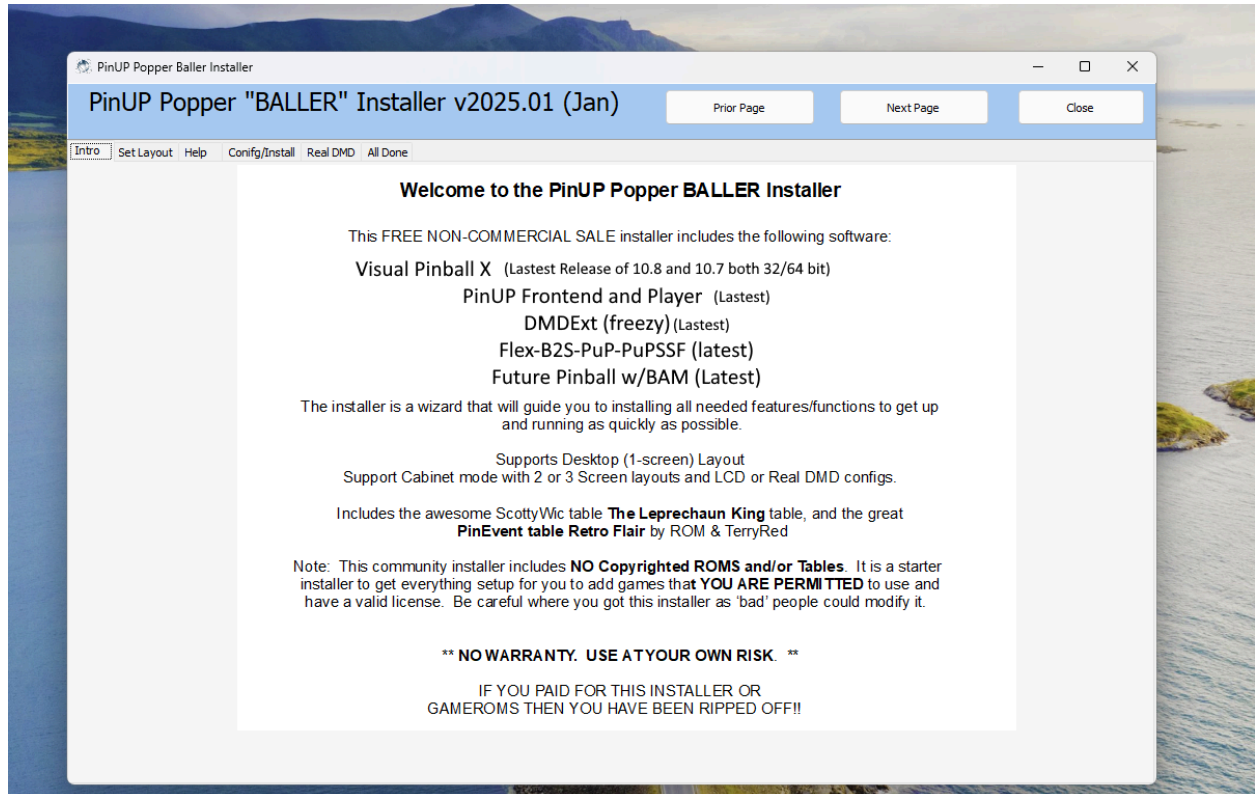

- a. “Completing the PinUP Popper Baller Installer Setup Wizard”
 - i. Make sure run config is checked.
 - ii. Finish
 - iii. “Set Up- PinUP Popper Baller Installer...” will close.

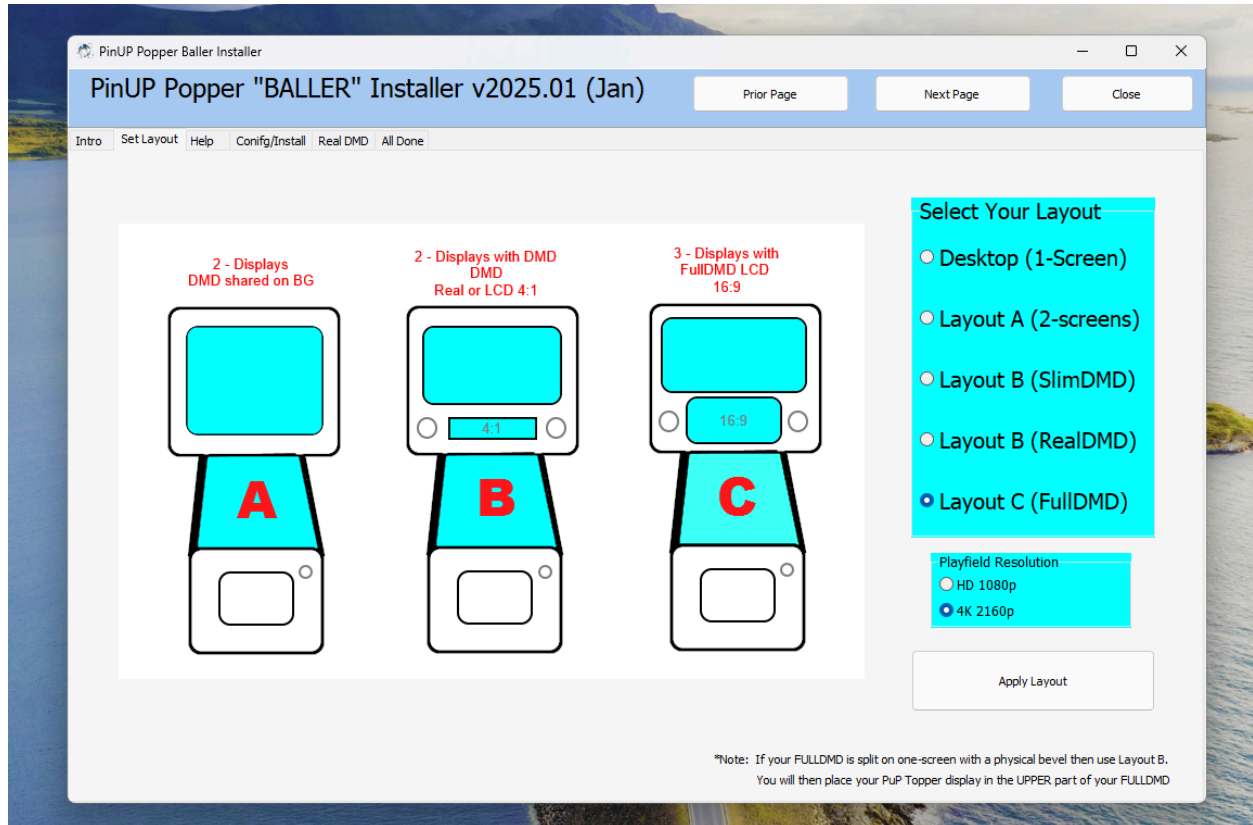

7. PinUP Popper Baller Installer

a. Intro

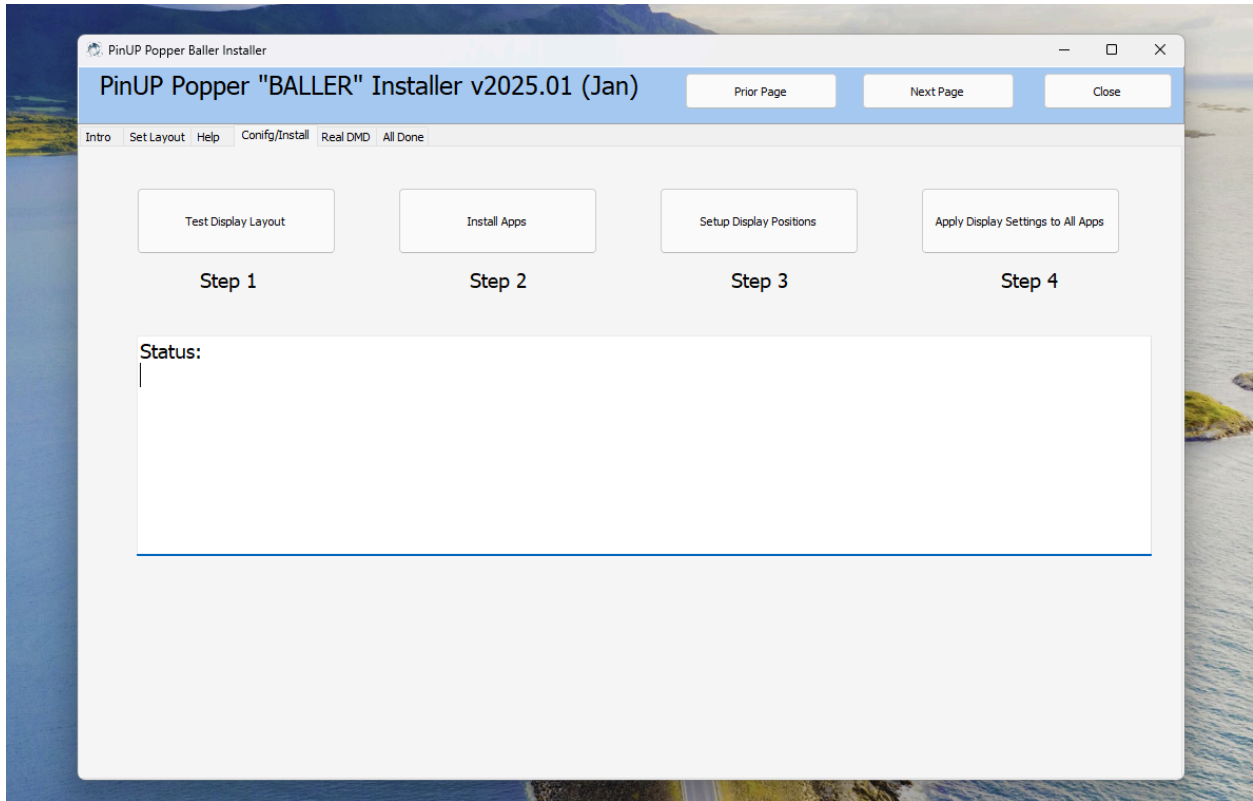

i. Next page

- b. Set Layout
 - i. Select your layout
 - 1. Layout C (FullDMD)
 - ii. Playfield Resolution
 - 1. 4K 2160p
 - iii. Apply Layout

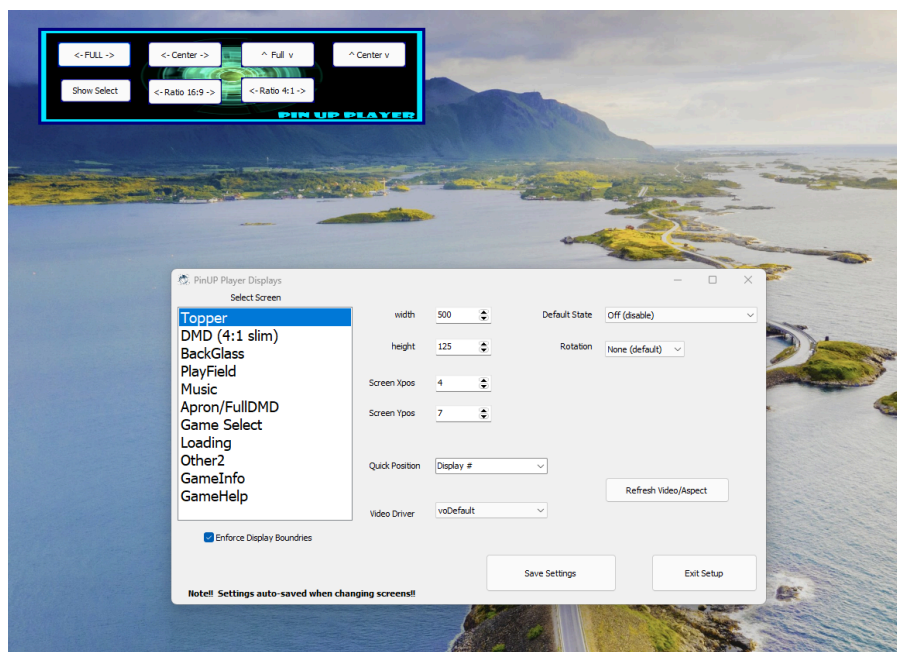

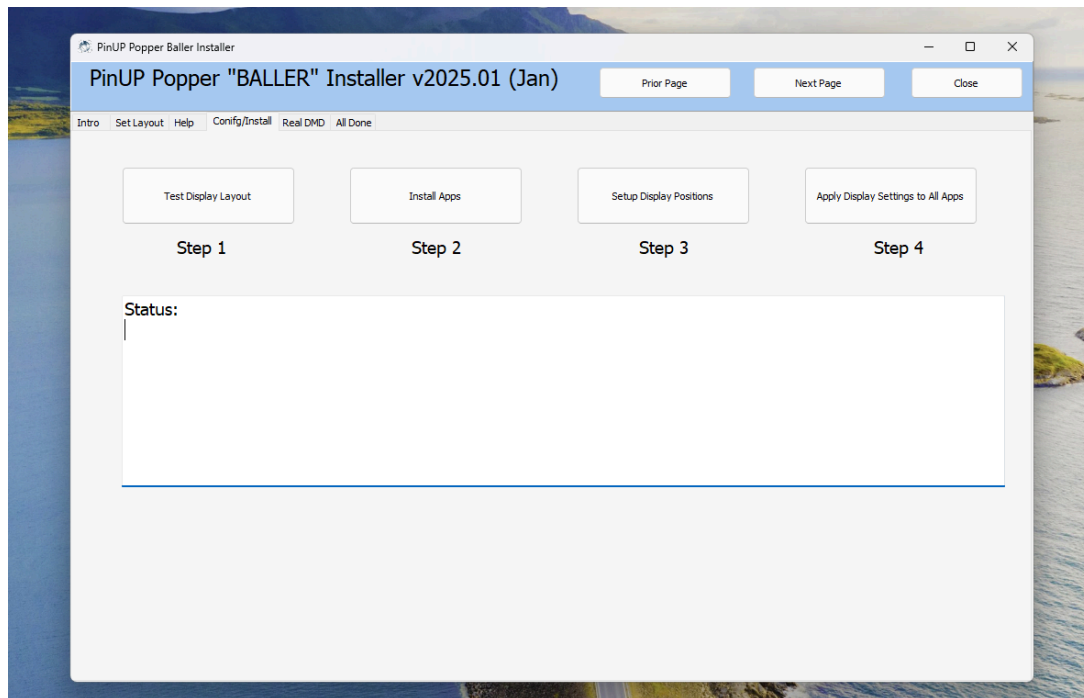

- c. Help
 - i. Check Windows “Display” Settings again.
 - ii. Next page
- d. Config/Install (This portion has laid out steps that will guide you through).

- i. Step 1: Test Display Layout
- ii. Step 2: Install Apps
 - 1. Apps will open and close. Ignore them.
- iii. Step 3: Setup Display Positions
 - 1. Topper
 - a. Drag to the top of the DMD, even if you don't have one.
 - 2. Slim DMD
 - a. My build is using a full DMD, but it is still necessary to drag it over to the bottom of your DMD.
 - 3. Backglass
 - a. Drag to backglass screen. Select “full screen”.
 - 4. Playfield
 - a. Make sure it is on you playfield screen. Select “full screen”.
 - b. If your setting menu gets covered click “show select” to get it back.
 - 5. Music

- a. Drag to DMD and select “full screen”.
6. Apron/FullDMD
 - a. Drag to DMD and select “full screen”.
7. Save settings
8. Exit Setup
- iv. Step 4: Apply Display Settings to all Apps
 1. Next Step- DMD Page

- e. Real DMD

- i. Select FullDMD
 - 1. Ensure it is in the correct position.
- ii. Select Show Backglass
 - 1. Ensure it is in the correct position.
- iii. Test DMD
 - 1. Drag it to the correct position.
 - 2. Resize
 - 3. Not a huge thing to worry about right now, DMD can and will be adjusted later.
- iv. Save DMD settings
 - 1. Right click and “save globally”.
- v. Stop Test
- vi. Next Page
- f. All Done
 - i. You're all done with the install!

8. Checking for PinUp Popper Updates

- a. Open the “PinUp” Folder that is now on your desktop.
- b. Open “PinUp Popper Config”.
- c. Press the globe icon in the right-hand corner.
- d. Ensure all PinUp apps are closed and you are connected to the internet.
- e. Select “yes”.
- f. PinUpdater
 - i. Select “check for updates” in the right hand corner.
 - ii. Select “apply updates” in the right hand corner.
 - iii. Once finished select “OK”.

9. Turning Antivirus back on and adding exclusions

- a. Navigate to the “Virus and Threat Protection” settings in Windows
 - i. Under Virus & Threat Protections Settings select “Add or remove exclusions”
 1. Select “add an exclusion”
 2. Select “folder”
 3. Naviage to “C:” (often “this PC” → “windows (C:)”
 4. Select “vPinball” Folder
 5. Do the same for the “PinUp” Folder
 - a. Located on the desktop
 - ii. Under Virus & Threat Protections Settings switch the following to on:
 1. Real-time protection
 2. Dev Drive Protection
 3. Cloud-Delivered Protection
 4. Automatic sample submission
 5. Tamper Protection

10. Enjoy!

- a. Run “PinUp Popper Front End” in the PinUp Folder to play!

What's Next?

- Enjoy the free tables included!
- Controller Set up
 - Configure PinOne as a controller to navigate in PinUp Popper Front End
 - Configure PinOne as a controller with VPX
- Download more tables
 - Find tables online and add them to your system.
- Launch Future Pinball in the PinUp Folder to ensure it is functioning.
 - File
 - Open table
 - RetroFlair
 - Play table
- Adding media for downloaded games
- DOF/DOFLinx
 - Haptic Feedback systems, if you have haptic feedback toys
 - NOT included in PinUp Baller Installer
 - Separate applications that need to be downloaded and configured
 - Check out our other tutorial!
